

### MINEDEX Resource Estimates by Project

Displays the current total Resource Estimate (contained commodity) for each MINEDEX (Mines and Mineral Deposits database) Project. MINEDEX Projects contain Sites with the same ownership and Primary Commodity. Project spatial location is that of the MINEDEX Site with the largest Resource Estimate contributing to the total contained commodity for that Project. Spatial data includes estimate location (MINEDEX Site) and intersects (Tectonic Unit, Map Sheets, Local Government Authority, Development Region, and Mining District). Estimate data includes Site Name, Project Name, Project Code, Estimate Dates, Estimate Type, Resource Category, Resource Status, Calculation Method, Reporting Code, and Quantity and Grade for all estimated commodities. Dataset excludes MINEDEX Supplementary estimates (estimates that spatial overlap another current estimate) and ended estimates. These data are held in GDA 94 decimal degrees.

- Statewide spatial datasets - [GDA1994]
