Western Australia atlas of mineral deposits and petroleum fields 2003

This ATLAS shows the location of Western Australia's mineral and petroleum resource projects and deposits, set against a background of simplified geology and topographic information. The publication is an update of the 'Western Australia atlas of mineral deposits and petroleum fields 2001'.

This publication draws together data from a number of sources. The minerals information comes from the Department of Industry and Resources' (DoIR; formerly Department of Mineral and Petroleum Resources, or MPR) 'Mines and Mineral Deposits' database (MINEDEX). Since its inception in 1984, MINEDEX has recorded the sites of all mines and deposits with defined resources. Nickel, alumina, and silicon smelters or refineries have also been added in this edition, but most processing plants have been excluded. A total of 3760 sites are plotted in the ATLAS. Names of 1274 major sites have been included, with priority given to operating mines. Quarries for construction materials (rock, aggregate, gravel, and sand) and sites with confidential location information have been omitted. Other site types listed in MINEDEX that are not displayed in this ATLAS include power plants, transportation and handling facilities, tailings storage facilities, and some exploration sites.

The index at the back of the ATLAS categorizes sites by their stage of development, using 'o' for operating sites and those currently being developed for commercial production, 'u' for undeveloped deposits, and 'c' representing closed operations and those currently under care and maintenance as at mid-2002. On the map, named operating sites appear in black, whereas closed or undeveloped sites are shown in grey. Commercial ownership of named sites (and projects) is listed in the index.

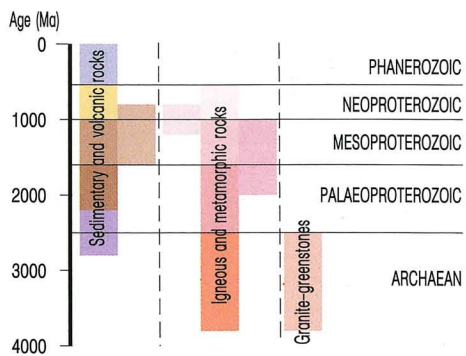

Mineral commodities, ownership, stage of development, and location of each site have been extracted from the MINEDEX database, which is continually being updated with a new digital release approximately every six months. Details of the MINEDEX data are available in GSWA Record 2002/19, or can be viewed on the web at <http://www.doir.wa.gov.au/minedex2/>. Further enquiries as to the status of the sites and projects included in this booklet can be made by calling 61 8 9222 3890 or email roger.cooper@doir.wa.gov.au.

Information about mineral exploration data can be obtained from the 'Western Australia Mineral Exploration' database (WAMEX). Petroleum and non-mineral downstream processing operations can be viewed on MPR's Major Resource Projects map (August 2002 edition).

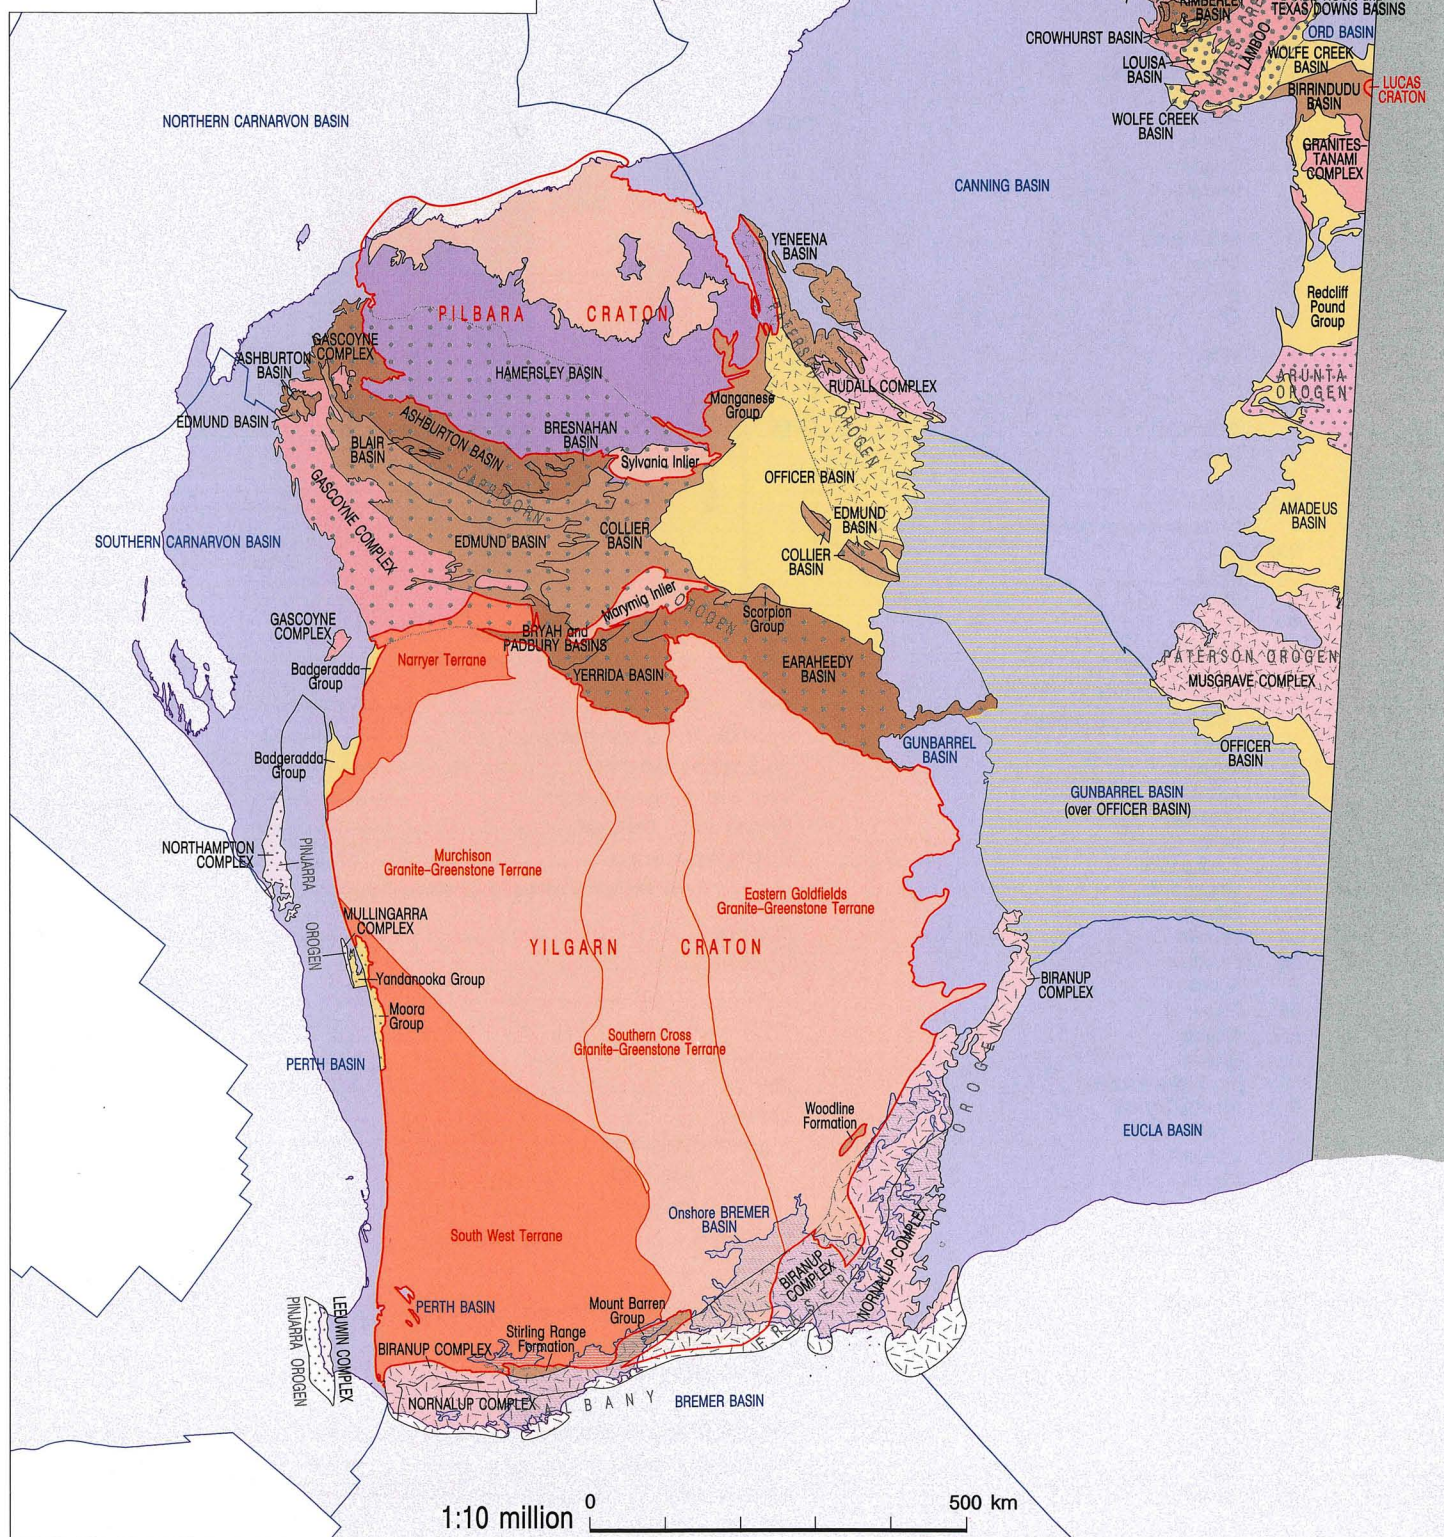

The petroleum data has been extracted from DoIR's 'Western Australian Petroleum Information System' database (WAPIMS). Only major fields are shown, and are identified by the discovery well. Information is also available from the publication series 'Schedule of petroleum wells'. Enquiries regarding petroleum discoveries, reserves, development projects, and production should be addressed to DoIR's Petroleum Division.

All maps in this publication have been produced using the Albers Equal Area Projection (Geocentric Datum of Australia 1994), with central meridian 121°00'E and standard parallels 17°30' and 31°30'S.

MAIN TECTONIC UNITS OF WESTERN AUSTRALIA

Compiled by I. M. Tyler and R. M. Hocking 1999–2001,
based on J. S. Myers and R. M. Hocking, 1998,
Geological map of Western Australia 1:2 500 000 (13th edition)
and R. M. Hocking, 1994, GSWA Record 1994/4

TO LOCATE A PROJECT

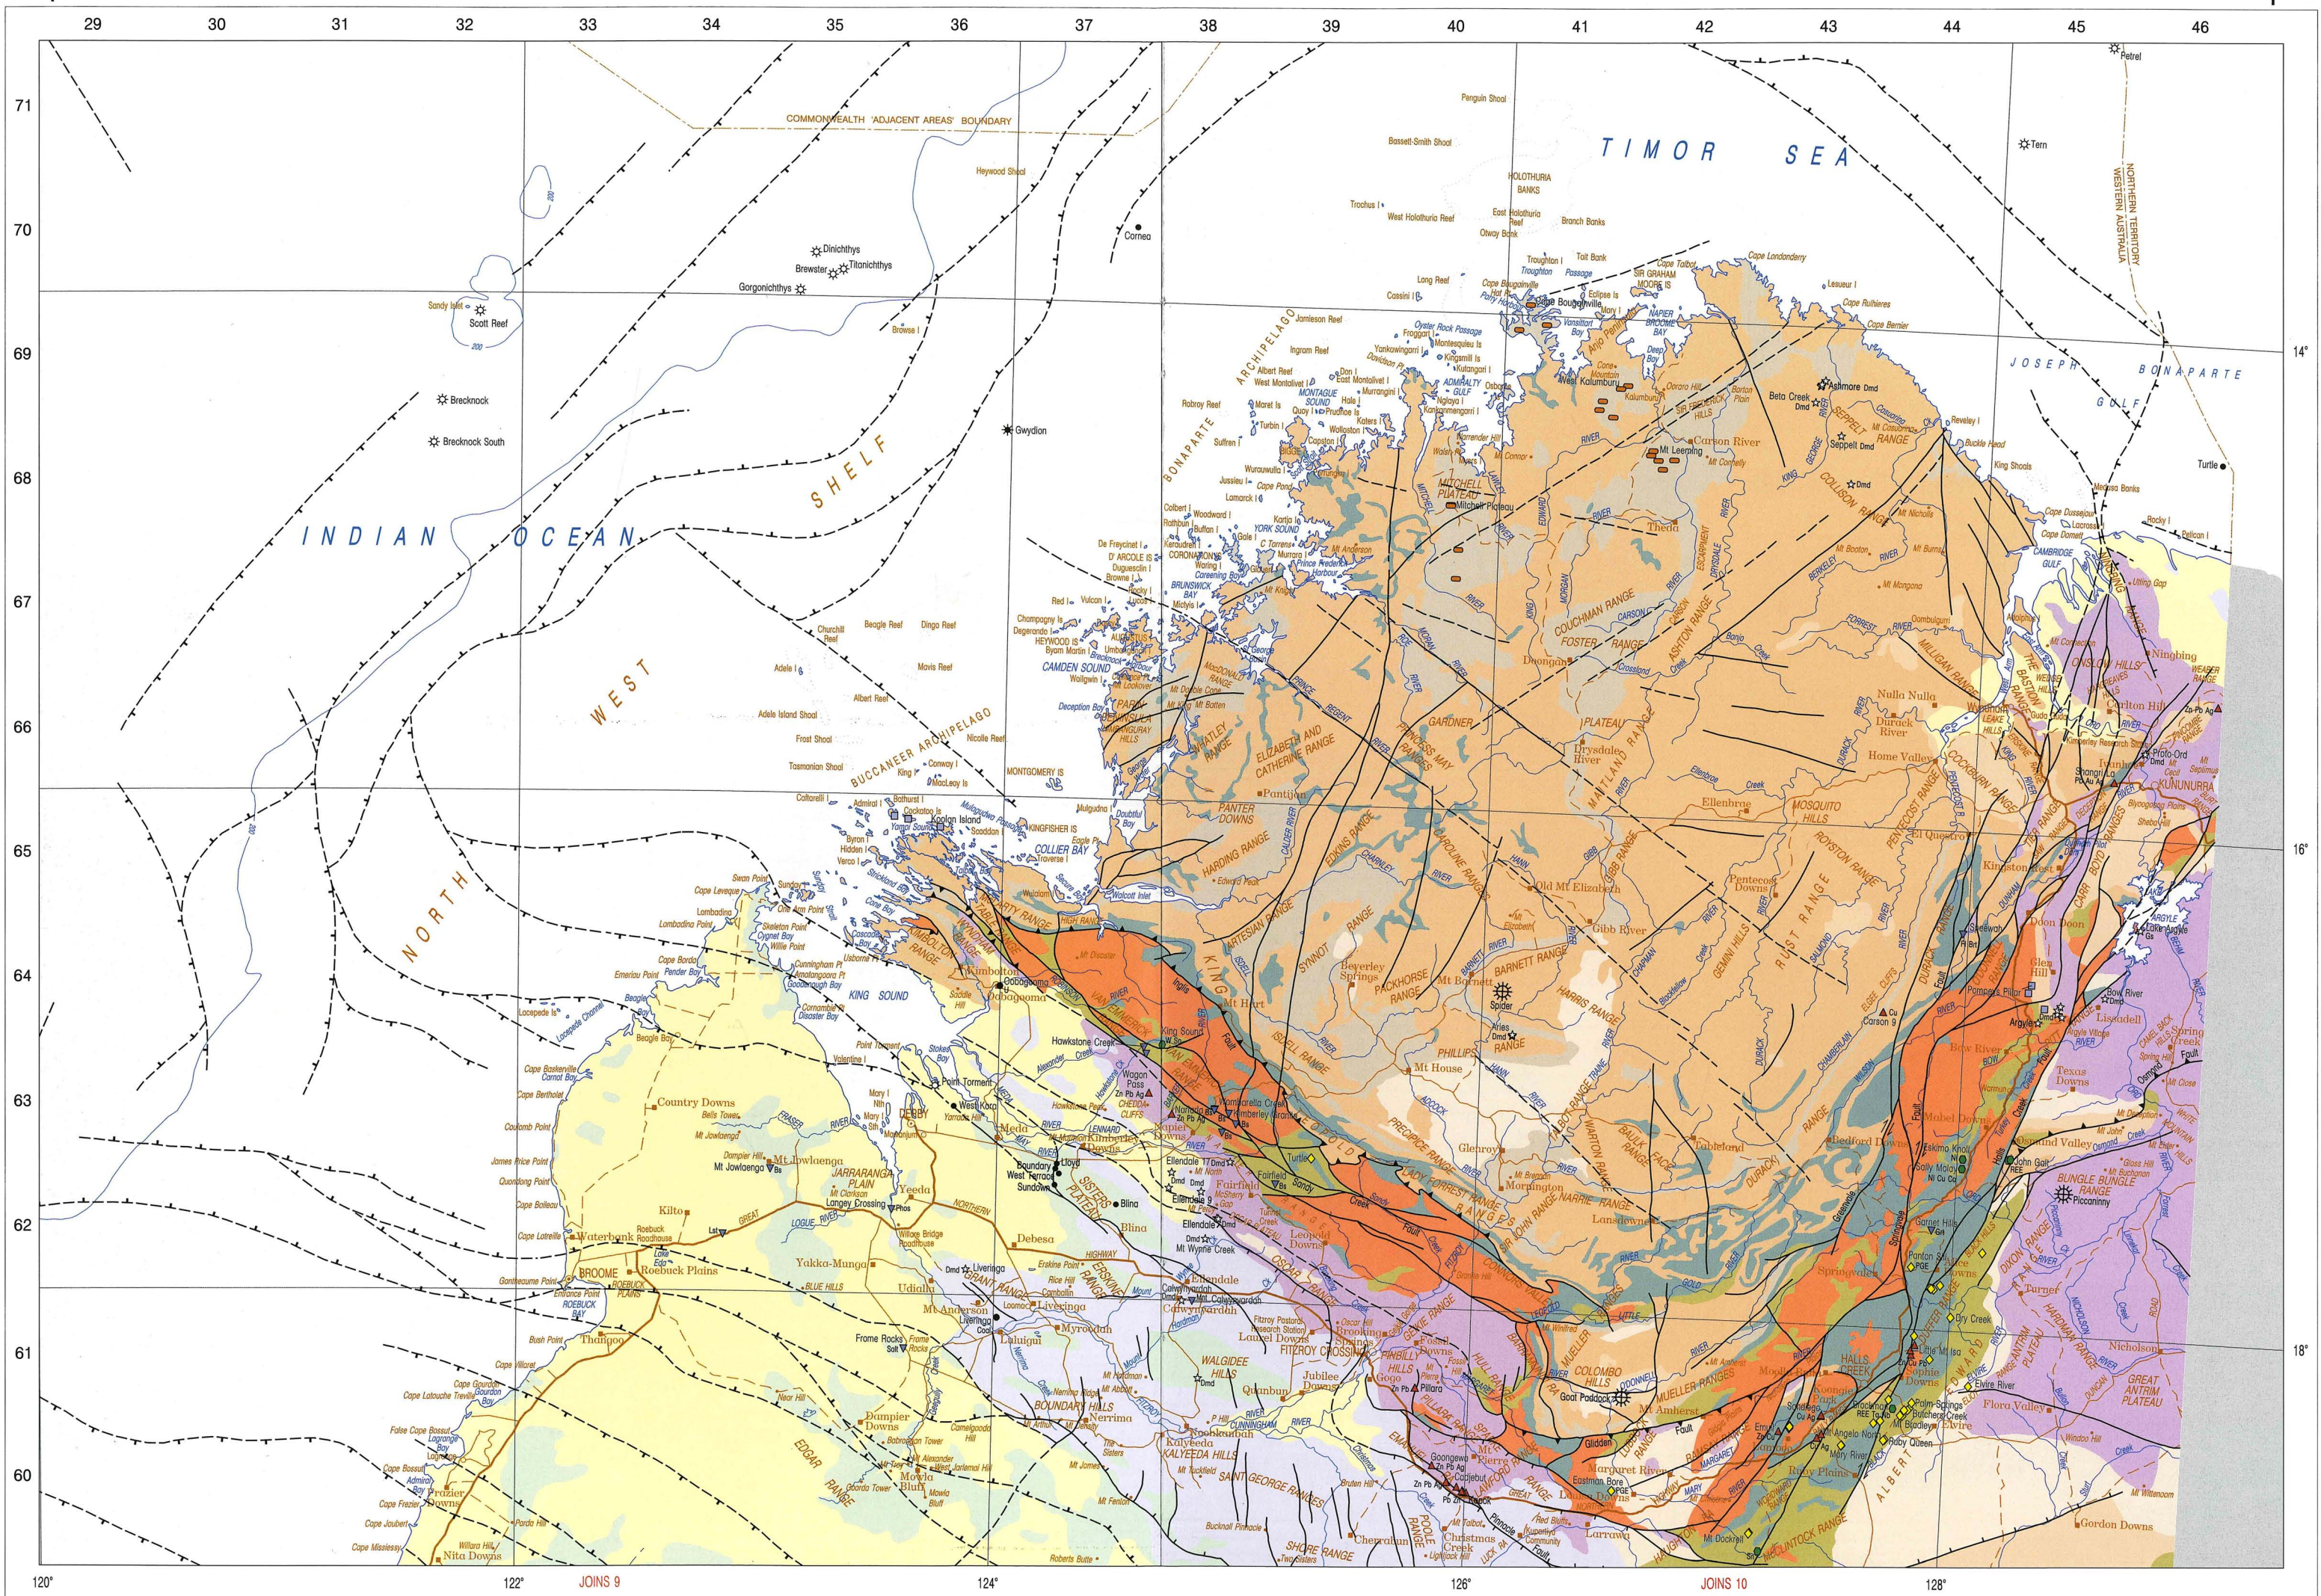

Two code numbers are used to locate a site in this booklet. The first code number is the map number in this atlas, and the second represents the 1:100 000 map sheet number. From the four digit map sheet number, the first two digits give the east-west co-ordinate, and the second two digits the north-south co-ordinate.

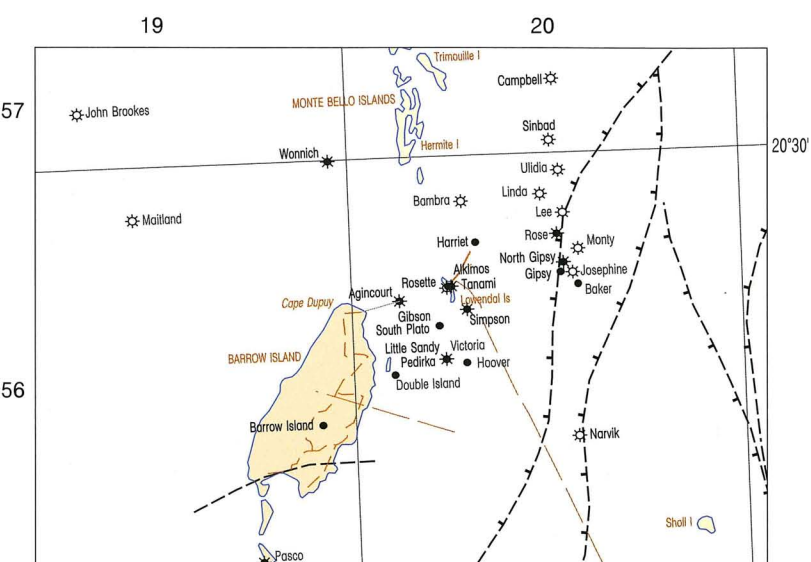

0 500 km

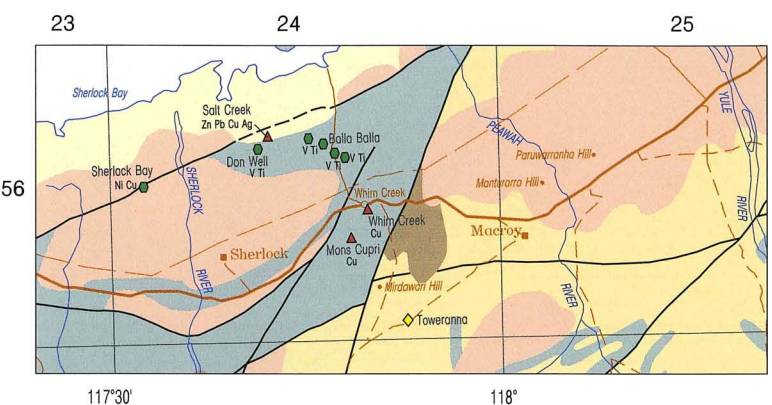

1:10 million
