Western Australia atlas of mineral deposits and petroleum fields 2007

compiled by

R. W. Cooper, P. B. Abeyasinghe, and D. J. Flint

This ATLAS shows the location of Western Australia's mineral and petroleum resource projects and deposits, set against a background of simplified geology and topographic information. The publication is an update of the 'Western Australia atlas of mineral deposits and petroleum fields 2005'.

This publication draws together data from a number of sources. The minerals information comes from the Department of Industry and Resources' (DoIR) 'Mines and mineral deposits' database (MINEDEX). Since its inception in 1984, MINEDEX has recorded the locations and other attributes of all mines and deposits with defined resources. Historic production sites (MH sites) were included in MINEDEX in 1999 and these sites are also shown in this ATLAS. Nickel, alumina, and silicon smelters or refineries have also been shown, but most processing plants have been excluded. A total of 16 015 sites are plotted in the ATLAS. Names of about 10% of those sites (1705 sites) are printed on the maps and appear in the index pages, with priority given to operating mines. Quarries for construction materials (rock, aggregate, gravel, and sand) and sites with confidential location information have been omitted. Other site types listed in MINEDEX that are not displayed in this ATLAS include power plants, transportation and handling facilities, tailings storage facilities, and some exploration sites.

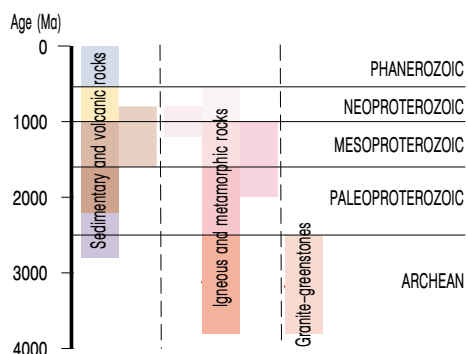

The index at the back of the ATLAS categorizes named sites by their stage of development, using 'o' for operating sites and those currently being developed for commercial production, 'u' for undeveloped deposits, 'h' for historic mine sites, and 'c' representing closed operations and those currently under care and maintenance as at August 2006. On the maps, named operating sites

appear in black, whereas closed, historic, or undeveloped named sites are shown in grey. Commercial ownership of named sites (and projects) is listed in the index. Historic mine sites are not linked to current projects, so commercial ownership has been left blank. Mineral commodities, ownership, stage of development, and location of each site have been extracted from the MINEDEX database, which is continually being updated. Digital downloads (updated monthly) or live direct web enquiries are both available from Online Databases at <<http://www.doir.wa.gov.au>>. Further enquiries as to the status of the sites and projects included in this booklet can be made by phoning +61 8 9222 3624 or by email to don.flint@doir.wa.gov.au.

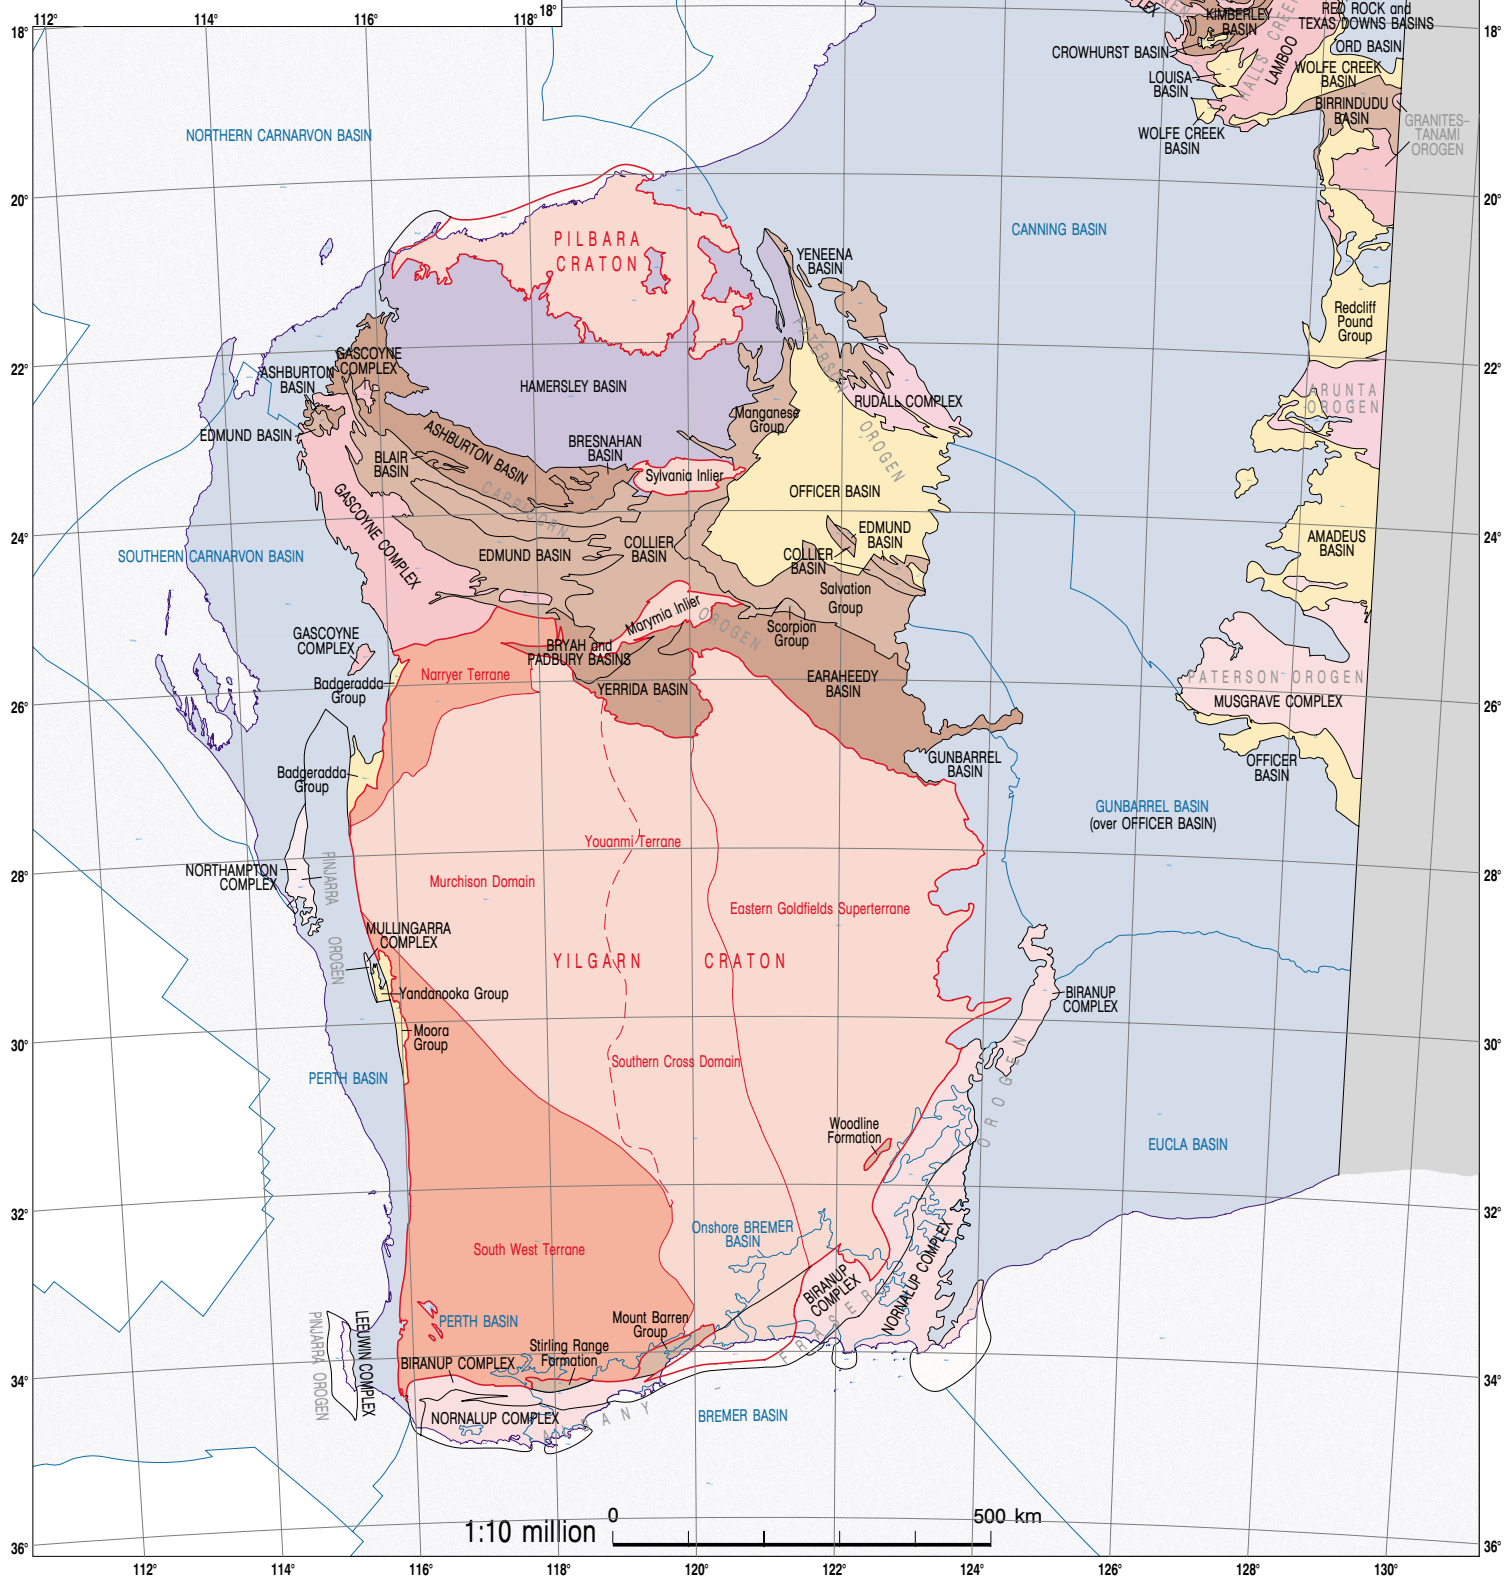

Mineral exploration data submitted to DoIR in mineral exploration reports can be obtained from the 'Western Australian mineral exploration' database (WAMEX). Petroleum and non-mineral downstream processing operations can be viewed on DoIR's annually updated 'Major resource projects' map. Petroleum data have been extracted from both DoIR's 'Western Australian petroleum information management system' database (WAPIMS) and the Petroleum and Royalties Division's information in the Minerals and Petroleum section of DoIR's website. Only major fields are shown, and are identified by a representative well for that field. Enquiries regarding petroleum discoveries, reserves, development projects, and production should be addressed to DoIR's Petroleum Division.

All maps in this publication have been produced using the Albers Equal Area Projection (Geocentric Datum of Australia 1994), with central meridian 121°00'E and standard parallels 17°30' and 31°30'S.

MAIN TECTONIC UNITS OF WESTERN AUSTRALIA

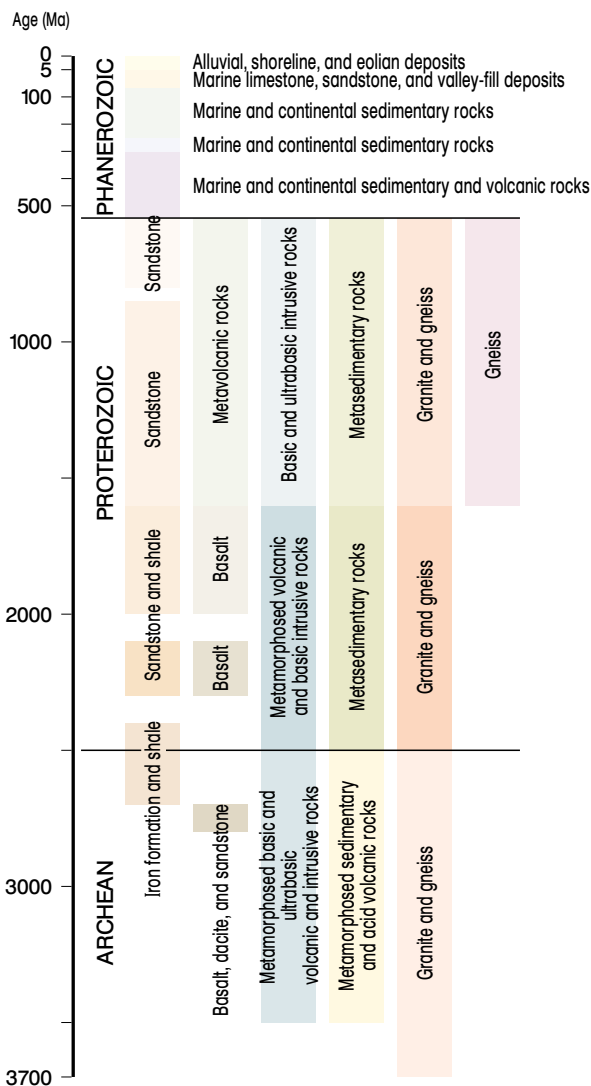

Compiled by I. M. Tyler and R. M. Hocking 1999–2006,
based on J. S. Myers and R. M. Hocking, 1998,
Geological map of Western Australia 1:2 500 000 (13th edition)
and R. M. Hocking, 1994, GSWA Record 1994/4

ATLAS REFERENCE

☆	PRECIOUS MINERAL
Aga	Agate

Mine, operating or under development.....	Trilogy
Deposit or closed/historic mine.....	Balladonia
Refinery or smelter.....
Inset map enlargement.....	11a

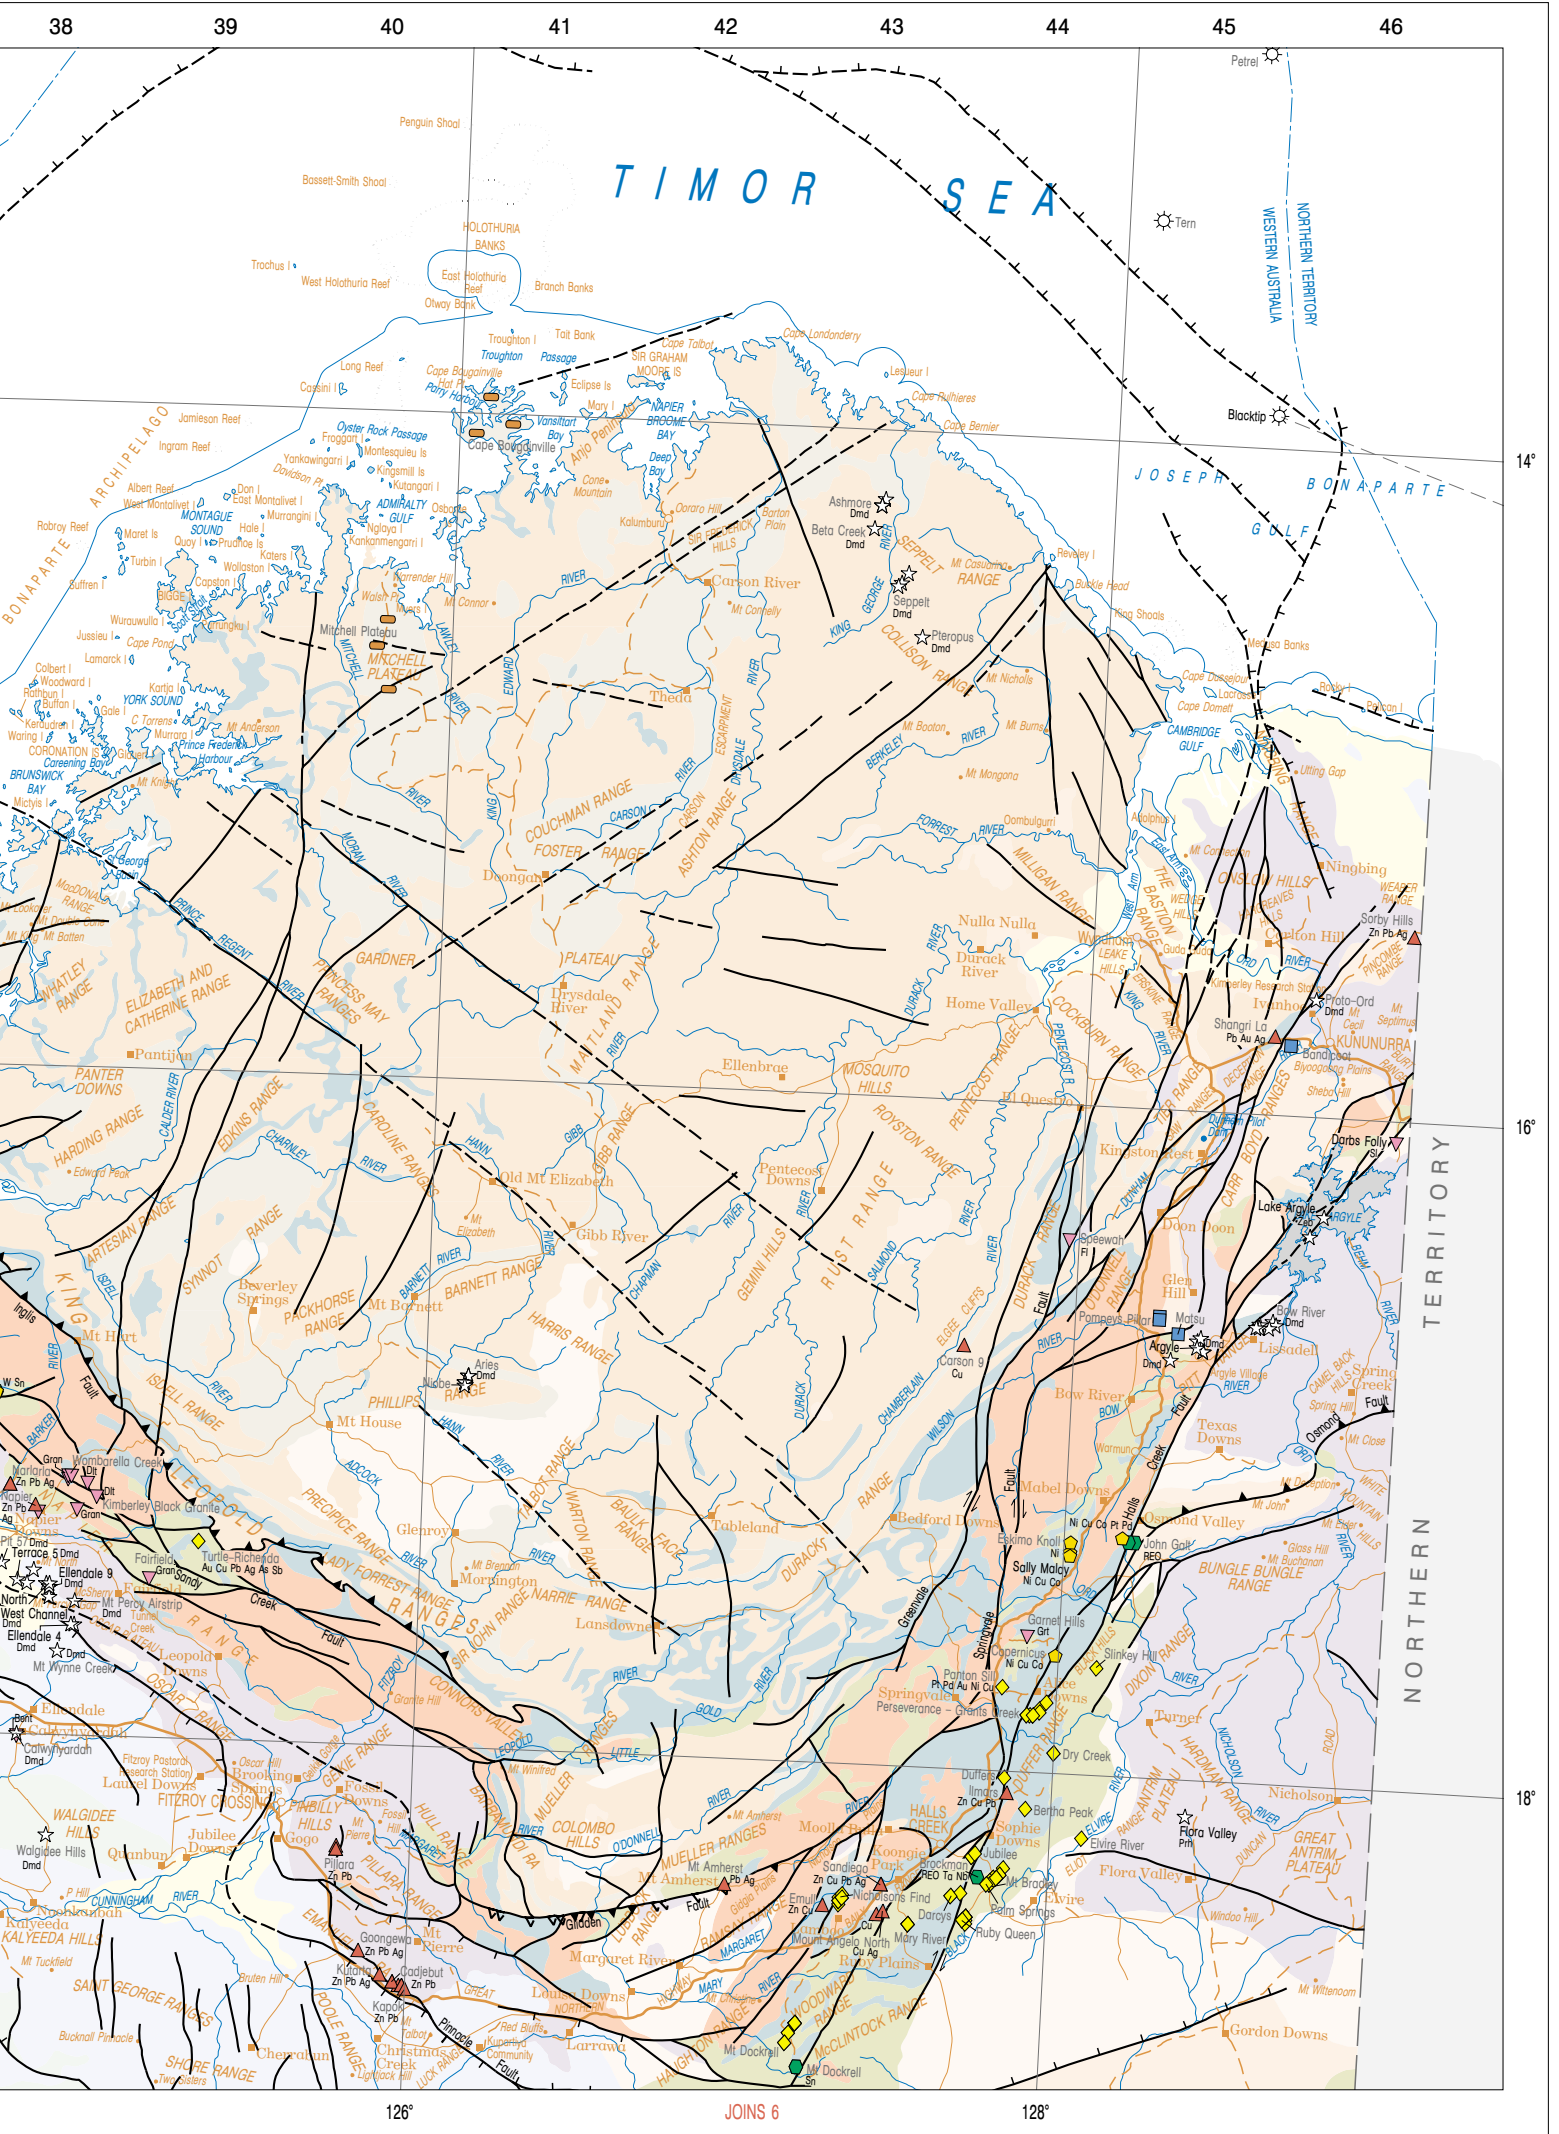

TO LOCATE A PROJECT

Two code numbers are used to locate a site in this booklet. The first code number is the map number in this atlas, and the second represents the 1:100 000 map sheet number. From the four digit map sheet number, the first two digits give the east-west coordinate, and the second two digits the north-south coordinate.
