

This compilation of aeromagnetic features is based on airborne geophysical data acquired under the National Geoscience Mapping Accord by the Australian Geological Survey Organisation (AGSO), Commonwealth Department of Primary Industries and Energy. The interpretation is based on data presented as 1:100 000 scale profiles, contours and images of total magnetic intensity, and profiles and images of the first vertical derivative.

This map is not intended to represent a geological interpretation of aeromagnetic features.

SURVEY SPECIFICATIONS

Flown by: World Geoscience Corporation Ltd
Date flown: 1994
Line spacing: 400 m
Line direction: 090-270 degrees
Terrain clearance: 60 m above ground level
Sampling interval: 7 m (0.1 seconds)
Instrument: Helium magnetometer
Data acquisition and reduction: World Geoscience Corporation Ltd
IGRF removed: 1990

True north, grid north and magnetic north are shown diagrammatically for the centre of the map. Magnetic north is correct for 1990 and moves westerly by about 0.1° in five years.
