

This data package provides information on the potential availability of limesand and limestone that occur along the south coast of Western Australia between Denmark and Esperance and their hinterland. All main sources of limesand and limestone have been identified as have other sites that are potential sources of these materials. Quality information of the limesand and limestone, including chemical analyses of carbonate samples, are also presented for the south coast project area.

Datasets featured:

Resource information

- Quarries and pits
- Resource bedrock
- Resource surficial
- Dolomitic sand sample analyses
- Limesand sample analyses
- Limestone sample analyses
- Magnesite sample analyses
- Water bores

Mineralization and exploration

- Mining tenements (TENGRAPH) for BRM
- Mines and mineral deposits (MINEDEX) for BRM
- Extractive Industry Licences

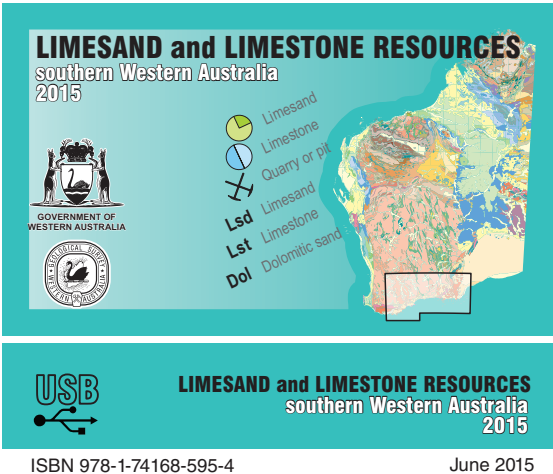

Administrative data

- Class A National Parks and Nature Reserves
- Crown reserves
- Ramsar wetlands
- Natural resource management regions

Topography

Remotely sensed information

- High resolution shaded relief
- Landsat Thematic Mapper (TM)
- Digital elevation model from Shuttle Radar Topography Mission (SRTM)

Limesand and limestone resources of southern Western Australia, 2015

Product available from First Floor counter, Mineral House, 100 Plain St, East Perth, WA 6004, AUSTRALIA. Order online at: <www.dmp.wa.gov.au/ebookshop>.
