

# Finding geology in Perth city – App

Exploring geology in Perth City is even easier using the **Everythere** app. From Queens Gardens where clay was extracted for brick making, to polished granite facing stone and fossils peering from gate posts – a walk through the city streets opens up a world of exotic building stone.

Six waypoints lead the curious explorer 2.5 km on a walking or cycling trail from East Perth through the heart of the city. The keen walker or cyclist can continue a further 2.3 km to finish the trail at a bluff on Mounts Bay Road at the base of Kaata Gar-up / Mount Eliza. The app page for each location becomes active as the user approaches the waypoint.

Scan the QR code to download the app or start the tour.
