

1:500 000 State Regolith (2002) Southern Sheet - Preliminary (South of 26th Parallel)

The digital 1:500 000 regolith map of Western Australia (preliminary edition) is based on published GSWA 1:250 000 and 1:100 000 series geological maps. These maps have been simplified for display at 1:500 000 scale to include nine geological units (exposed (areas of outcrop), colluvium, alluvium, lacustrine, coastal, tidal, calcrete, sandplain and residual) as well as areas of mining activity. This map is available with a grid spacing of 1300, 800 or 500 metres. Data is held in GDA decimal degrees either in ESRI Shape or MapInfo TAB formats.
